

WONDER CLOTHES

BECAUSE of the high cost of wools and other materials it costs us more to make Wonder clothes now than at any time during our thirty years of clothes-building.

A Wonder suit or top coat is a bigger bargain today than ever before, because you save not only the middleman's profit of \$5 to \$8, but also a part of our usual profit. This we must sacrifice for the present to maintain our high standard of quality at our widely advertised price—ALWAYS \$10.

We will profit in the end, for no man who buys Wonder clothes now will ever forget that he received the same big value for his money as we have always given, even at a time when any manufacturer would be justified in giving less.

Prove this out—and remember the Wonder guarantee—your money back if you say so.

WORLD COURT OF LAW ADVOCATED

Speaker at International Law Society Session Urges League of Nations.

The establishment of a "World Court" or "Alliance of Nations" with power to enforce its decisions, was urged by speakers at the meeting of the American Society of International Law last night in discussing the question, "Should the right to establish war zones on the high seas be recognized and what, if any, should be the provisions of international law on this subject?"

Amos S. Hershey, professor of political science and international law in the University of Virginia, in putting the question, said, "The submarine like automatic contact mines, is employed without warrant or authority on the high seas. Through these two methods, 3,117 non-combatants have lost their lives."

"We can no longer put our trust in platonic Hague conventions, in neutralization scraps of paper, or in good intentions embodied in arbitration treaties. There must be a hard and fast league of states, who shall incorporate a convention on this subject, with many others, into their articles of agreement. It also might include a guarantee of international arbitration in disputes of a judicial nature; of the rights of small nationalities; of police such as the Monroe Doctrine; of the open door in China and elsewhere; and of the fundamental principles of international law."

Paper Is Read.

In the absence of Francis N. Thorpe, professor of political science and constitutional law in the University of Pittsburgh, his paper on the subject was read.

It said in part: "German submarines comply with none of the so-called obligations of international law. It destroys life and property without regard to obligation, rule, agreement, or observance of practice hitherto observed by civilized peoples."

The paper gave a sketch of the entire field embraced by the question, and in summing up said:

"A world sovereignty must be the sovereignty to determine whether or not it is the right of a sovereign to establish a war zone—an organized world opinion comprising a membership able and willing to execute its sentences."

GEN. SMITH HAS BUT SLIM SHOW

Doubtful Whether Senate Will Reconsider Vote—Unlikely Ballot Will Be Reversed.

Although Senator Martine, of New Jersey, intends to press for a reconsideration of the vote by which the Senate refused to confirm the nomination of Gen. Robert G. Smith as member of the District excise board, it is regarded as doubtful whether such reconsideration will be obtained, and doubly questionable whether a change in the result could be brought about.

The House Juvenile Court bill has been referred to the Judiciary committee of the Senate, instead of to the District committee. This is believed to have been a mistake, as the District committee has had similar measures under consideration and has a Judiciary subcommittee, under the chairmanship of Senator Pomerene. The Senate will be asked for unanimous consent to re-consider the bill and send it to the District committee.

Senator Pomerene said yesterday that he favored early consideration of the bill in committee if it should be re-referred, as he believed that the measure is meritorious in the main.

The Senate District Committee yesterday deadlocked on the Smith bill permitting a 2 per cent interest charge on small loans in the District. The vote was six to six, Senators Smith, of Maryland; James, Martin, Sherman and Hollis favoring the bill, and Senators Pomerene, Sutherland, Jones, Kenyon, Sterling, and Weeks opposing.

The committee ordered a favorable report on the Swanson bill increasing the number and rank of city detectives.

CLEVELAND PARK FOLK OPPOSE POWER PLANT

School and Community Association Complains Stacks at Proposed Site Would Mar City's Beauty.

A resolution opposing the location of the government heating and lighting plant near the Mall, where its smokestack would mar the beauties of the National Capital, was adopted by the Cleveland Park School and Community Association at a meeting in the John Eaton School last night.

Speakers pointed out that if located on Eleventh street southwest, as proposed, the stacks would be directly in the line of the vista from the Washington Monument to the Capitol.

Representative Tinkham's bill for civil service in the District government also was endorsed.

Dr. Arthur L. Day, of the Carnegie Institute, related the peculiarities of Lassen Peak, the only active volcano in America.
